

Industrial Tablet PC – for total mobility.

TraffiComTM

**THE WIRELESS CLIENT
FOR EXTREME ENVIRONMENTS**

Shark. The Ultraslim Tablet PC for demanding environments.

Shark is a rugged light weight industrial Tablet PC that brings you unsurpassed mobility. You can use the TraffiCom Shark either mounted on a vehicle, in the palm of you hand or with a hands free PC holder. A bright, high contrast touch screen gives the TraffiCom Shark excellent ergonomics.

A flexible and portable workstation with a wide range of accessories. Enjoy full flexibility with the vehicle docking station, table stand, port replicator, wearable solutions, WLAN, WAN, Bluetooth and other accessories. You can collect and receive data wherever it is required.

Continuos operation is achieved by the "hot-swap" function which enables you to switch battery without rebooting. The Lithium Ion battery guarantees many hours of operation.

Built for extreme environments. The rugged design including IP65 protection enables you to use the TraffiCom Shark exactly where you need it. No limitations due to dust, rain, cold or heat. The TraffiCom Shark has been tested for shock and vibration according to military standards and withstands multiple drops to concrete.

Easy data input via touch screen, 10 hotkeys or an external keyboard. Data can also be captured by connecting Bar Code or RFID readers.
